Materials

Brass, glass

Designer

Born and raised in rural Vermont, Karl Zahn's work with wood and natural materials developed out of his time spent playing in forests and wood shops. His designs express a pared down simplicity and stark aesthetic that blends modernist hard lines with traditional furniture craft. After earning a degree in product design from the Rhode Island School of Design in 2003, Karl travelled to San Francisco, where he immersed himself in the creative and complicated metalworking culture that thrives there. In 2007, he moved to New York to begin working on his own. He lives in Greenpoint, Brooklyn.

BOUNCE

A compact spinoff on the original series, Karl Zahn's Bounce table lamp combines a folded aluminum shade and an independently positioned light source. One side of the shade is white to reflect illumination while the other has a decorative wood veneer finish.

III

DEMETER

Named after the goddess of the harvest, the Demeter series was inspired by the symbol of the scales commonly associated with her. Built from transversal poles with opposing elements at either end, Demeter achieves an elegant sense of balance through economy of means and engineering.

MODO

Like other fixtures in the series, the Modò desk lamp was inspired by the kinds of ready-made, off-the-shelf parts that can be found at inexpensive lighting stores. Unlike those, however, Modò is painstakingly engineered and custom CNC-milled from solid metal.

Jason Miller is a Brooklyn-based designer and the founder of Roll & Hill. Born in New York and raised in Darien, Connecticut, Jason's suburban upbringing heavily influenced his early, more conceptual pieces — duct-taped chairs and racked vases, among them — and continues to inform the elegant, historically rich work that has become his signature. Jason received an MFA in painting and spent time in both the art and advertising worlds, but soon realized he preferred making things to documenting them. His designs — like a mirror whose photographic surface recalls a painted landscape — still often reflect those early preoccupations, but each is a functional object, with a kind of beauty and wit. Today, Jason runs both Jason Miller Studio and Roll & Hill from his headquarters in Sunset Park, Brooklyn. He lives nearby with his daughter, Tuesday.

COUNTERWEIGHT

The Counterweight floor lamp is part of a series of LED fixtures made of gently arching, steam-bent wood that uses marble and brass as ballasts. Whether fixed, as at the base of this floor lamp, or acting to cantilever the arms of the other, mobile lights also found in the Counterweight series, the mass of the stone and metal acts as a foil to the otherwise lightweight frames.

CANDLES

IX

AGNES CANDELABRA

The Agnes Candelabra are inspired by our heroine Agnes, a worker in the world’s oldest profession during the 1849 American Gold Rush. Defying the expected roles as wife and mother, she instead chose the fierce independence and transient lifestyle of the frontier. The modular system allows Agnes easy setup in her makeshift “workspace.”

Designer

Lindsey Adelman designs and produces lighting in Manhattan. Lindsey discovered Industrial Design while working at the Smithsonian and introducing herself to a woman carving French fries out of foam for an exhibition. Thinking that looked like more fun than her editorial job, she left to get a degree in ID from the Rhode Island School of Design in 1996. Her work has been exhibited at the Cooper-Hewitt Museum, Design Miami, and Nilufar Gallery. Her body of work has grown to include vessels, jewelry, blankets, wallpaper, tiles, and video. Always asking the question “what if?” the studio now embraces a philanthropic mission supporting Robin Hood Foundation to fight poverty in NYC. She lives with her designer husband Ian and their son Finn in Brooklyn.

x

BUGIA

Bugia's delicate steel structure is an ode to the perfect shape of rings. The name directly translates to "candleholder" in Italian; however, it also means "white lie." The elegant design uses minimal means for a striking effect, recalling the iconic candlesticks used before the invention of electricity. Designed by Formafantasma, whose practice is rooted in cultural and historical nuance, this candleholder, too, alludes to a timeless practice.

Finish

● Brushed Brass

Steel, leather

Designer

Andrea Trimarchi and Simone Farresin are Formafantasma, an Italian designer duo based in Amsterdam. Since graduating from the Design Academy Eindhoven in 2009, they have forged a distinctive practice characterized by careful attention to process and sustainability, and a critical consideration of materials and their historical value. They work as much with leather, wood, and charcoal as with ideas and concepts, ever mindful of the political and cultural forces informing their decisions. Formafantasma's work has been presented and collected by museums internationally, including the Museum of Modern Art and the Metropolitan Museum, New York; Victoria & Albert Museum, London; Chicago Art Institute; and the Stedelijk in Hertogenbosch, Netherlands. Trimarchi and Farresin also direct workshops and teach at the Design Academy Eindhoven.

XI

CACHE

With its removable brass top and hollow stone base, Cache holds more than a candle. Inspired by the need to contain a growing collection of new and vintage matchbooks, and playing on the French word for “hiding,” this modern reliquary is perfect for stashing small keepsakes and private mementos.

Designer

James Killinger was born and raised in of the American Midwest. Before moving to his current home in Brooklyn, New York, James earned separate bachelor's degrees in art and psychology at Iowa State University. With a desire to reconcile his aesthetic expression and curiosity for human behavior, James obtained a masters degree for industrial design at Pratt Institute. His background in studio craft and time studying furniture design in Denmark continue to inform his playful, yet honest, approach to ideas and materials.

XII

CROSS

A two-dimensional shape, when crossed with another, becomes a three-dimensional object. This is the inspiration for a series of candlesticks by Bec Brittain—flat metal forms are interlocked and held together by a small leather keystone to create beautiful functional objects.

Finishes

● Polished Nickel ● Polished Brass

Materials

Brass, leather

Designer

Bec Brittain studied industrial design at Parsons, earned a BA in philosophy from New York University, and received an architecture degree from The Architectural Association in London. Bec draws from these different modes of thinking and making to create relationships between normally disparate elements. Her aim is to create work eliciting both an immediate sensual reaction, and a more gradual appreciation of a larger aesthetic concept. Located in New York City, Bec's studio focuses on lighting design and custom projects. Bec has been featured in *Architectural Digest*, *The New York Times*, *Elle Décor* and *Dwell*. Her work can be seen in commercial and residential projects across the world.

XIII

GAMBALUNGA

The elegant Gambalunga seems to defy gravity. The paired-down design defies what one would imagine a candleholder should be while also achieving a sense of familiarity. The circular base both grounds the object and catches melting wax, a reflection of Formafantasma's studious attention to form and function.

ABOUT

Roll & Hill collaborates with some of the most exciting independent designers working today to create a collection of beautiful and unique lighting fixtures. Roll & Hill was founded in 2010 by Jason Miller, whose experience as a designer and producer inspired him to create a company that might harness the talents of those independent designers, while offering a small-batch production model that's more often associated with boutique studios.

Roll & Hill is committed to on-demand production, which allows for each piece to be customized to a client's needs. At Roll & Hill's headquarters in Sunset Park, Brooklyn, parts are assembled by hand, one lamp at a time.

Roll & Hill's pieces draw from a rich material palette that includes brass, bronze, leather, wood, hand-knotted rope and mouth-blown glass. Roll & Hill's designers often pair historical elements with contemporary forms to create lights that feel familiar, yet totally new.
